

Anarmani Liberty School

Class: 10

First Internal Assessment - Computer Science

Full Marks: 75

Pass Marks: 38

Time: 2:15 hrs

Group A [2 Marks Each]

1. Write two features of C programming language.
2. What is a keyword in C language? List two rules of naming variables in C language.
3. What is data type? List the data types used in C with examples.
4. Define operator. List the different types of operators.
5. Differentiate between while and do-while loop.
6. Define computer network and network protocol. Classify the computer network on the basis of size.
7. Differentiate between switch and hub.
8. Differentiate between P2P and Client-Server architecture with figure.
9. What is looping? List the types of loops in C.
10. What is social media? List two merits and two demerits of it.
11. Define web browser and search engine. Give two examples of each.
12. What is m-commerce? What are the different models of E-commerce?
13. Define Network topology and Internet. List any five services of internet.
14. Differentiate between traditional commerce and e-commerce.
15. What is online payment? List different modes of electronic payment.
16. Define digital footprint. List two ways to create positive footprints.
17. What is digital citizen and digital citizenship? List major themes of digital citizenship.
18. What is computer ethics? Write any two commandments of it.
19. What is cybercrime? Give two examples of it. List the provisions of ETA.
20. What is data communication? List basic elements.
21. List few advantages, disadvantages, and features of bus topology.
22. List few advantages, disadvantages, and features of star topology.
23. List few advantages, disadvantages, and features of ring topology.

Group B [4 Marks Each]

1. WAP in C to check whether a number is odd or even.
2. WAP in C to find the greatest among three numbers.
3. WAP in C to calculate simple interest.
4. Using C, print the following series: 1, 2, 3, 4, ... 10 (using for loop)
5. Using C, print the following series: 1, 2, 3, 4, ... 10 (using while loop, and do-while loop).
6. Write the full forms of the following:
STP, UTP, MODEM, POP, SMTP, TCP/IP, NIC, WLAN, Telnet,
URL, VOIP, PSTN, TELNET, ARPA, DNS, ATM, FTP, ETA
7. Number System Conversions and Binary Operations:
 - a. Convert 3F9A (hex) to decimal.
 - b. Convert 7382 (decimal) to octal.
 - c. Convert 1254 (decimal) to hexadecimal.
 - d. Convert 7352 (octal) to binary.
 - e. Convert 2F9B (hexadecimal) to binary.
 - f. Divide 1101101 by 101 (binary division).
 - g. Multiply 10111 by 1101 (binary multiplication).
